

Harvest Water Construction Contractor Outreach Event

Regional San is hosting a Contractor Outreach event on **Thursday, May 11, 2023 from 9 AM to 11 AM PDT** to share information with the contracting community about the various pumping and conveyance projects that will be constructed as part of the Harvest Water Program.

Harvest Water is a large, recycled water capital improvement program that, when completed, will deliver up to 50,000 acre-feet per year of highly treated recycled water to agricultural properties in South Sacramento County for crop irrigation in lieu of using groundwater, and for other ecological benefits. The Harvest Water system will consist of a 105-mgd pumping station, roughly 41 miles of large diameter transmission and distribution pipelines, and over 120 connection assemblies on growers' properties to control the delivery of water. More information can be found at www.regionalsan.com/harvest-water. The table below shows the anticipated advertisement and bid opening dates for the various construction packages.

This outreach event will happen in person at the Sacramento Regional Wastewater Treatment Plant located at 8521 Laguna Station Road, Elk Grove, CA 95758. **All attendees must RSVP** so that names can be provided to our guard station to allow entry. Please RSVP with all attendee names and affiliation to Elizabeth Brown via email at brownel@sacsewer.com no later than 3 PM on Wednesday, May 10, 2023.

Project	Anticipated Advertisement Date	Anticipated Bid Opening Date
Franklin-Eschinger Pipelines	May 25, 2023	June 28, 2023
West Distribution Pipelines	June 14, 2023	July 19, 2023
Harvest Water Pumping Station	July 12, 2023	Aug. 16, 2023
Central/South Distribution Pipelines	July 26, 2023	Aug. 30, 2023
Elk Grove Transmission Pipeline	Oct. 25, 2023	Dec. 6, 2023
On-Farm Connection Assemblies	Jan. 10, 2024	March 13, 2024
